EDUCATION

National University Fairview

Bachelor of Science in Computer Engineering

- Computer Engineering Dean's Lister (2021-2024)

Quezon City, Metro Manila

A.Y. 2021-2025

EXPERIENCE

Dr. Jose N. Rodriguez Memorial Hospital and Sanitarium

Information Technology Support Intern

- Provided IT support for daily operations, troubleshooting system and hardware issues.
- Assisted in maintaining operational workflows and ensuring system reliability
- Supported documentation and publication processes, improving consistency and efficiency.
- Collaborated with staff to resolve technical issues in a fast-paced environment.

Caloocan City, Metro Manila

Apr 2025 – Jun 2025

PROJECTS

Cloud Resume Project (AWS, Terraform, CI/CD)

Personal Project | 2026

- Built a serverless visitor tracking system using AWS Lambda and DynamoDB
- Designed and deployed a cloud-hosted portfolio using Amazon S3, CloudFront, and API Gateway
- Implemented infrastructure provisioning using Terraform with remote state management
- Automated testing and deployment pipelines using GitHub Actions (CI/CD)
- Implemented API design and data tracking logic to handle unique visitor counting with cooldown-based logic
- Designed system with scalability and cost-efficiency using serverless architecture

Wi-Vou: Wi-Fi Voucher Dispenser System (Best Embedded Systems Project)

Embedded Systems Project | 2025

- Developed a system that distributes Wi-Fi vouchers via ID-based access using ESP32
- Integrated hardware and software systems for real-time user interaction
- Designed database logic for tracking voucher distribution and user registration
- Built a web interface for system monitoring and control
- Awarded **Best Embedded Systems Project**, outperforming competing systems including an AI-based baby cry detection device

Sumobot Competition Robot (1st Runner-Up)

Robotics Project | 2024

- Designed and developed a competitive sumobot for autonomous combat scenarios
- Implemented sensor-based navigation and opponent detection
- Optimized movement and control strategies for competitive performance
- Achieved **1st Runner-Up**, demonstrating effective system design and teamwork

SKILLS

Cloud and DevOps:

- AWS (S3, CloudFront, Lambda, API Gateway, DynamoDB)
- Terraform (Infrastructure as Code)
- GitHub Actions (CI/CD)

Programming: Python, JavaScript, C++

Web Development: HTML, CSS, JavaScript

Tools & Systems: Git, Linux (basic), REST APIs
